Introduction To Digital Learning

The times are changing. Learning styles are changing. Gone are the days when you can move around freely in your classroom, keeping an eye on every student, a stern look here, a caring word there, depending on which student needs what... all that is a thing of the past. Let us learn to adapt to the changing times, learn to move forward, get future-ready.

Learn to integrate technology as a learning tool in the classroom not as a replacement for effective teaching.

Retooling Traditional Teaching to Millennials

- Engage students and mould their minds.
- Explore virtual teaching styles and shape the future.
- Explain concepts leveraging technology.
- Elaborate by encouraging student participation.
- Evaluate outcomes creatively.

5 Hours Of Simulated Learning

Shift dynamics to become Experts of Virtual Teaching.

Transition from a Physical to a Virtual Environment.

Understand the New Age Classroom.

Create a Student-friendly Virtual Classroom.

8 Expert Faculties

Over 140 years of Experience

Over 15 days of Continuous Effort

Delivered in 5 days, 5 Modules
